

Dear Sirs,

We are proud to have the opportunity to present our company. Joosen Transport is an independent haulier, specialized in transport of seacontainers. Our flexible team and operators, having the best knowledge and experience, are at your service.

To accomplish this job we provide a fleet of 80 own trucks, completed with an extra 25 subcontractors. Please see our website (www.transportjoosen.be) to find out our possibilities for handling and transporting all kind of containers.

Our modern fleet is equipped with satellite communication as well as scanners, what gives us the advantage to follow up our trucks from the start till the end, to provide our clients with the exact information on any moment of their cargo and to provide them with all paperwork directly after loading or unloading of the cargo.

As we have moved to Antwerp harbour, where we dispose of a 25000 m² secured area, we are able to provide You with some extra services, such as storage of empty and full containers, small reparations and cleaning or lining up of containers.

Furthermore we are very proud to announce You that since 07/01/2013 we are AEO-certified (BE AEO0000130GDA) as one of the first hauliers in Belgium. This certificate shows once more that Joosen Transport is a reliable transport partner.

To serve our clients even better, we offer them as from now also our logistic services and conventional transports. This way we enable the clients to arrange their complete transport order by instructing one person.

If any more questions or more information needed, do not hesitate to contact us. We will be very happy to have the opportunity to convince You of our strenght, flexibility, correctness,...

Meanwhile, we remain,
Kind regards,

Yves Haud'Huyze
Sales Manager
